Web Sites and Web-Based Solutions For Small to Mid-Sized Businesses

Simple, Flexible, User-Friendly and Cost-Effective Web Site Software that puts you in control of communicating with your customers...

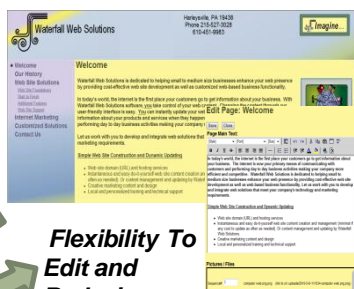

- Easy to create a brand new look and content or migrate your existing web site
- Instantly change and update content from any internet connected PC. It's as easy as editing documents with Microsoft Word. Or we can manage all or some of your web site for you— you decide what works best for you!
- Insert product and service photos or images (logos, diagrams, etc.) directly from any PC
- Save time, money, and attract repeat customer visits by changing your design, colors, content as often as needed without a call to your webmaster
- Local hosting, training, creative marketing and technical support

And think about all the other creative web-based business solutions you can add...

- Customer Feedback Mechanisms (on-line surveys, contact us, etc.)
- Customer Communications, Events Listings and Promotions
- Customer or Supplier Specific interface for ordering, individual product offerings, customer order history
- Integrate your web site with existing databases or other online applications--payment software (such as Pay Pal) or scheduling software (appointments or sports team schedules)
- Create Collaborative Work Spaces with discussion threads, file repositories, databases
- Overall Process Automation for increased efficiencies
- Collect, measure and report web site visitor and frequency information
- OR... What innovations do you imagine?

Let your innovative web presence drive your business growth. ..

Visit our web site, www.waterfallwebsolutions.com and give us a call to discuss the process to host, create, and launch your self-driven web site and cost-effective web-based solutions.
